JUAN MANUEL GIMENEZ

Cloud engineer

PROFESSIONAL PROFILE

I'm Juan, an SRE and DevOps Engineer from Buenos Aires/Calabria specializing in Azure infrastructure, Kubernetes, automation, and observability.

I help companies build cloud platforms, reduce technical debt, improve monitoring, and respond effectively to incidents, my expertise includes Terraform, GitHub Actions, AKS, Helm, Istio, Grafana, Prometheus, and Azure Monitor.

Recently, I've been focusing on AIOps and intelligent alerting to reduce noise and improve operational efficiency.

LATEST POSITION

Senior SRE

Beazley | 2025 - 2026

At Beazley, I am responsible for ensuring the uptime and proper functioning of their insurance web applications during the US timezone.

I manage Azure Web Apps, their networking, infrastructure, and databases all provisioned with Terraform, stored in GitHub, and deployed via GitHub Actions in Azure.

I use Grafana, ServiceNow, Azure Alerts/Monitor/KQL, Snowflake and Kafka UI for monitoring.

I also create and maintain documentation, and prepare monthly reports on the performance and issues of these web applications.

Integrated Azure AI tools into all applications to improve platform reliability and observability.

LANGUAGES

- Spanish - Native - Written and spoken
- English - C1 - Written and spoken
